

Youssef Salem Hassan – Flutter Developer

Pyramids Garden, Giza(Egypt) | Phone-number: +201026855881

Gmail: youssef.salem.hassan582@gmail.com | LinkedIn: [Youssef Hassan](#) | GitHub: [YoussefSalem582](#) |

Portfolio: <https://youssefsalem582.github.io/Youssef-Hassan-Portfolio/> | Mostaql: [Profile Link](#)

Personal Statement:

Highly motivated Computer Science undergraduate (Nile University) with hands-on experience in Flutter development, RESTful APIs, and mobile app architecture. Proficient in Dart and Firebase, with strong knowledge of Clean Architecture, MVVM, and state management. Skilled in creating responsive, high-performance, and visually appealing apps, ensuring seamless functionality and user experience. Passionate about transforming creative designs into efficient digital solutions and continuously improving through innovation, collaboration, and emerging mobile technologies.

Education:

School of Information Technology and Computer Science, Nile University – Giza, Egypt

Undergraduate Student | 2021 – 2026 (Expected)

- **Major:** Computer Science
- **Relevant Courses:** Software Engineering, Data Structures & Algorithms, Database systems
- **Graduation Project:** *Multi-Emotion Recognition App* – AI-based customer sentiment analysis using Flutter and Python (Grade: A)

Experience:

Mostaql.com – Remote, Egypt

Mobile App Developer (Freelancer) | April 2025 – Present

- Designed and launched multiple Flutter mobile applications for clients across different industries.
- Translated UI/UX designs into responsive and visually engaging interfaces.
- Applied Git for version control and agile task tracking for iterative deliveries.

Route IT Training Center – Egypt

Flutter Development Diploma | February 2025 – June 2025

- Completed professional Flutter training covering BLoC, Provider, and GetX state management.
- Built and deployed several cross-platform applications as portfolio projects.

CodeAlpha & UneeQ Interns – Remote, Egypt

Flutter Developer Intern | March 2025

- Built multiple feature-rich applications from UI prototypes using Flutter and Dart, translating design mockups into fully functional interfaces.
- Focused on UI design, component reusability, and implementing modern design principles for improved UX.

Digital Egypt Pioneers Initiative (DEPI) – Microsoft ML Engineer Track

AI & Software Engineering Trainee | October 2024 – May 2025

- Learned and implemented Python-based ML and REST API integration in Microsoft's applied learning modules.
- Gained understanding of cloud deployment and software pipeline design.

Telecom Egypt – Cairo, Egypt

Flutter Developer Intern | July 2024 – September 2024

- Focused on Dart logic optimization, app UI/UX, and clean architecture using the BLoC for state management.
- Integrated Firebase services including Authentication and Cloud Firestore to enhance app functionality.
- Participated in code reviews and cross-team discussions, improving both team workflow and project scalability.

Projects:

Personal Portfolio Website (Flutter Web)

(October 2025)

- Created a high-performance Flutter web portfolio with GetX state management.
- Integrated contact form via EmailJS and optimized UI for static deployment on GitHub Pages.

Gogesh – Full-Stack E-Commerce App

(September 2025)

- Developed a dual-role buyer/seller app with JWT authentication, PayTabs payment, and real-time chat.
- Integrated a custom REST API backend and managed app state with BLoC architecture.

Multi-Emotion Recognition System (Graduation Project)

(July 2025)

- AI-based app detecting emotions via text, voice, and video for customer service enhancement.
- Integrated Python backend (Flask) with Flutter frontend via REST APIs.
- Built real-time analytics dashboards, authentication, and admin/employee roles.

Sprints Shop App

(July 2025)

- Built a shopping application with secure user authentication, cart management, and payment system.
- Applied Flutter Intl localization for Arabic/English support and custom animations.

Chat App

(March 2025)

- Designed and implemented a real-time messaging application using Firebase Realtime Database.
- Integrated dark/light mode support and modular component structure.

Online Exam App

(March 2025)

- Created a quiz app using Flutter that fetches data from REST APIs with search, categories, and favorites features.
- Applied clean UI design principles and data persistence handling.

Music Player App

(March 2025)

- Developed a feature-rich Flutter music player with playlist management and audio controls.
- Enhanced user experience through custom animations and background playback optimization.

ChargeHub – EV & Gas Station Finder App

(September 2024)

- Implemented Google Maps API, Firebase Authentication, and real-time location updates.
- Designed an interactive UI optimized for performance and responsiveness.

Skills:

Technical Skills:

- **Programming:** Dart, Python, JavaScript
- **Frameworks & Tools:** Flutter (Android/iOS/Web), Firebase, REST APIs
- **State Management:** BLoC, GetX, MVVM, MVC
- **Version Control:** Git, GitHub, CI/CD (Basics)
- **Architecture & Design:** Clean Architecture, OOP, API Integration, Responsive UI, UX Optimization

Soft Skills:

- Strong teamwork and collaboration
- Effective communication and time management
- Detail-oriented with problem-solving mindset
- Passionate about writing clean and efficient code

Hobbies and Interests:

- Building side Flutter projects and prototypes
- Listening to software engineering podcasts
- Reading tech blogs and app design case studies
